<b>Objective (100 words)</b>	It should create awareness in the students through observation, discovery, analysis, experience, collaboration, and reflection. The focus is more on hands-on knowledge learned by doing, exploring, and acting upon challenges discovered within their surroundings.		
<b>Benefit in-terms of learning/skill/knowledge obtained</b>	Design thinking focuses on generating human-centered solutions to challenges by encouraging students to think out of the box. Critical thinking involves analyzing and evaluating data to solve problems effectively. It encourages students to question assumptions, examine evidence and objectively analyze the problem in order to make informed decisions. By integrating these key aspects into education, teachers can help students develop empathy, problem-solving skills and creativity, which are fundamental for tackling challenges
