7.1.2 The Institution has facilities and initiatives for Disabled-friendly, barrier free environment

Policy on Disabled-friendly, barrier free environment

Introduction:

It is illegal to discriminate against people with mental and physical disabilities under the Disability Rights Act of 2016. Disability discrimination is not tolerated in any form at Bethlehem Institute of Engineering (BIOE). The goal of BIOE was to create a thorough teaching and learning environment without upsetting or treating personnel and students who lack competence poorly. The College wants students to have access to its administration, programs, and activities. To determine the advantages of the field programs, administrations, and activities, all of the college's officers are attempting to assist the crippled. All College employees, including faculty, are subject to these guidelines.

Policy Objectives:

1. Students with disabilities are afforded equal chances by the college, with no distinction made based on physical appearance.
2. People with disabilities will always receive extra attention to help them get better and finish their education.
3. The institution offers the service of assigning scribes to write every exam offered by Anna University.
4. The Braille Blaster App and Non-Visual Desktop Access App are made available by the institution to help pupils understand more easily.
5. To give physically challenged students access to all resources, the institution makes sure that there are no barriers on campus for any student.

Initiatives taken by the Institution:

- For convenience, ramps have been built inside the campus.
- For their comfort, a barrier-free restroom is offered separately.
- The lab has Barrier Blaster software available for enhanced comprehension.
- There is a human assistance provision.
